

PVA HealthScan Module

For Livelink 9.7.x and Content Server 10.x

Preventive Maintenance for Your Repository

Over time, your system accumulates unneeded and forgotten documents, permissions, users and workflows that can slow performance and monopolize user licenses. PVA's HealthScan Module delivers a set of reporting functions to help you identify and clean up the Workflows, Repository Objects, and Users and Groups areas. In addition, it can help you understand object usage and activity profiles for your repository.

Find Unused Objects

Objects Not Accessed Since:

Type	Name	Last Access Date
Folder	Aircraft Painting	02/14/2005 12:02 PM
Folder	Completed Packages	02/14/2005 12:02 PM
Folder	December 30, 2004	02/14/2005 12:02 PM
Folder	DirectLink Customer Track	02/14/2005 12:02 PM
Folder	Engineering	02/14/2005 12:02 PM

Find Tasks Assigned to Deleted Users

Type	Name	User ID	Date Assigned	Date Due	Task List Name
Task	jenny (Delete) 3398	jenny (Delete) 3398	04/07/2005 09:39 AM	?	New Task List

The HealthScan Module

- ✓ Finds inactive users
- ✓ Detects broken URLs and Shortcuts
- ✓ Monitors per-user storage use
- ✓ Ensures proper assignment of Administration rights
- ✓ Helps you clean up after Deleted users

We Have the Expertise You Demand

Modules ♦ Customization ♦ Administration ♦ System Upgrades ♦ Workflows ♦ Training
